REACH GALAXIE

2D & 3D Pattern Design and Product Visualisation Software

REACH GALAXIE

2D & 3D Pattern Design and Product Visualization Software for the Apparel and Fashion Sectors

Benefits

- Easily create life like, realistic 3D digital apparel products without having to manufacture these physically saving material and time and contributing to a greener environment

- Share 3D digital garment samples with team members, customers and partners drastically cutting down product development time.

- Turbo charge your creativity exploring various options in fabric, colour, fit etc.

- Modify patterns and garments from the library to create new ones or create new ones from the scratch

- Leverage a range of fabric designs from the library

- Leverage a range of textures from the library

- Develop patterns, grade these and make optimal markers saving time and fabric costs
