Fashion Design Software

Give Wings to Your Creativity!

What does REACH Fashion Studio do?

Fashion products are, by definition, short lifecycle products.

Fashion value chain is also among the most complex and geographically exploded.

Retail outlets of fashion products could be in a country, designers in another, manufacturers in another and many sub contractors and suppliers in various other countries.

Designing garments according to changing consumer tastes and trends, getting these manufactured and delivered to retail outlets or to consumers directly is a complex task. That there are very many collections in a year, and that each collection has many garments, and the inability to deliver on time will lead to stock outs and mark downs makes this process a very complex, time sensitive one.

REACH Fashion Studio shortens product development cycle times by enabling design teams to use AI enabled easy to use tools to create designs easily and fast, and enhances business velocity by enabling collaboration between design, marketing and production teams.

REACH Fashion Studio for Industry Professionals

If you are a professional, getting trained on REACH Fashion Studio will enable you access opportunities in the digital fashion value chain and accelerate your professional growth.

Online and Onsite Training Programmes on REACH Fashion Studio are available through a range of institutions including universities, polytechnics, technical schools and skill training centres.
